

DIMER

GC STANDARDS

PART - 02

GC SECONDARY REFERENCE/WORKING STANDARDS

- Dimer provides pharmaceutical labs a wide range of secondary GC reference standards for various chromatographic and analytical applications.
- Our secondary GC standards give a acceptable and cost-effective alternative to the pharmacopeias primary standards and allow pharmaceutical companies to target resources on their key activities rather than preparing internal working standards.
- Traceability to USP reference standards are mentioned in the COA wherever available. Following supporting documents along with COA for each solvent.
- GC, 1H NMR, MASS, IR & COA.
